

Introduction to - Photogrammetry -

Dr Katrina Grant

Centre for Digital Humanities Research, Research School of Humanities and the Arts, ANU

katrina.grant@anu.edu.au  @orientalhotel

Dr Terhi Nurmikko-Fuller

Centre for Digital Humanities Research, Research School of Humanities and the Arts, ANU

terhi.nurmikko-fuller@anu.edu.au  @tmtn

Lesson Plan

- **Session 2:** This interactive session will enable the students to give feedback on their experience of working with the initial set of photos. This session is to discuss the particular challenges encountered by the students during their first foray into photogrammetry, and to suggest and/or report back on any possible solutions they will have discovered and implemented.

The students will then be given a second set of photographs, and set the task of completing the photogrammetry workflow with these images.

- **Session 3:** This final session is also an interactive seminar, in which students are able to give feedback and discuss their experiences of repeating the photogrammetry workflow with the second set of photographs. This will be an opportunity to celebrate the successful completion of the seminar, and to discuss possibilities and opportunities for future research and engagement.

Today

Overview of 3D modelling in GLAM
(Galleries Libraries Archives Museums) and cultural heritage

- 3D models as part of research process
- Impact and Engagement
- Challenges and Obstacles
- Project planning, collaboration and data preservation

Doing photogrammetry - three case studies

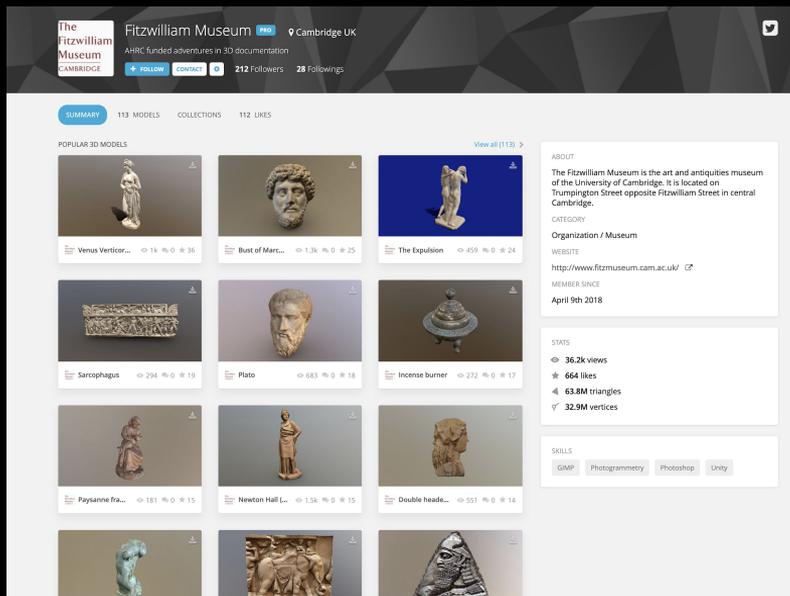

- British Museum Cuneiform Tablets (Terhi)
- National Museum of Australia Boab Nuts (Terhi)
- ANU Classics Museum small objects collection (Katrina)

Photogrammetry Process - a 5 minute primer!

Questions and Discussion

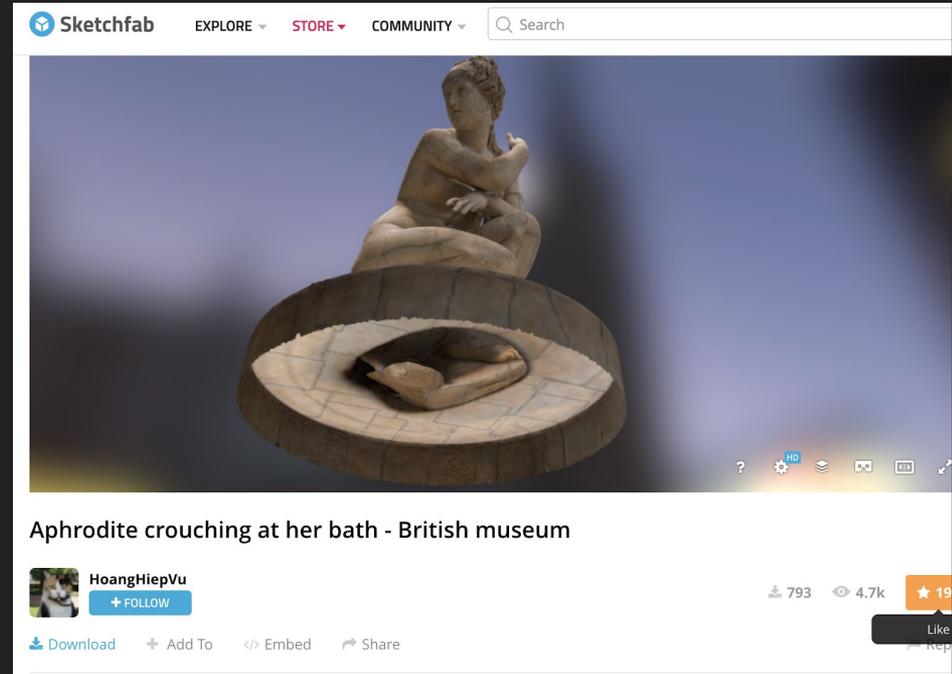

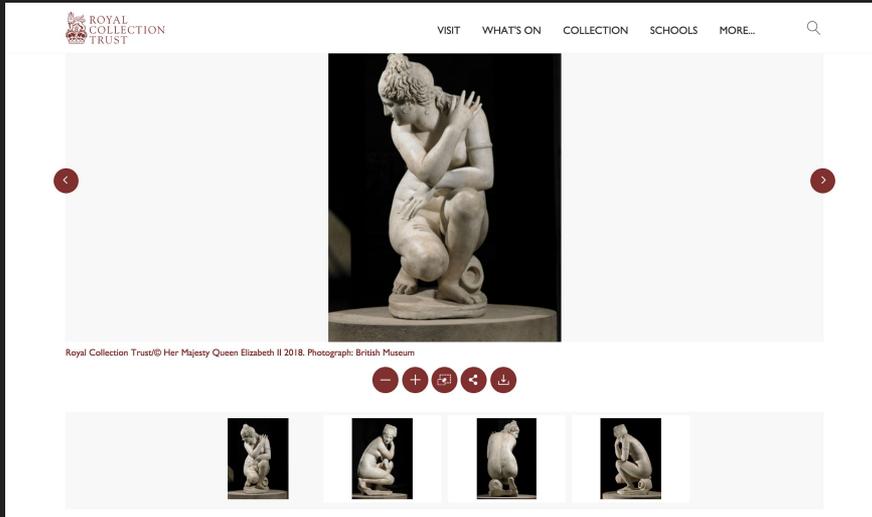

3D models and art history/curatorial research

- Increasingly popular but still not widespread compared to mass digitisation of collections in 2D
- Focus tends to be on sculpture and material culture objects
- Improving techniques allow high quality reproduction of more types of material
- Focus still mainly on public engagement

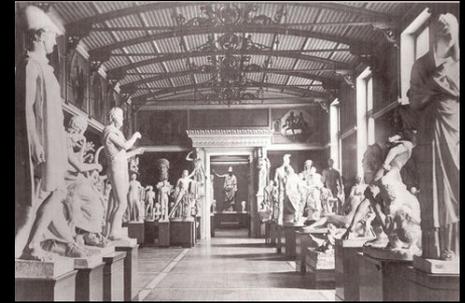

digitisation is an act of interpretation

Art Historian - consumer vs creator in the digital world

Practice-led research models?

Thinking about methods methodology and digital tools

Impact and Engagement

Think laterally about how the data and research you do can be engaged with.
Keep records of this!

Project management and collaboration

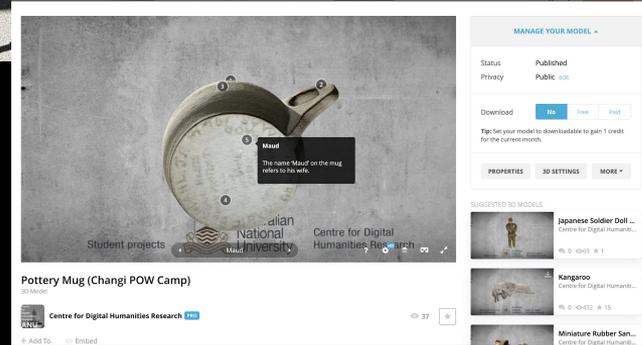

Setting up | Data management | Future preservation

Masters level student
carrying out
photogrammetry at the War
Memorial as part of the
HUMN3001/HUMN6003
course (run by Dr Katrina
Grant)

3D modelling
workshop with the
National Museum
of Australia's
Digital Team,
2019

Cuneiform Tablets at the British Museum

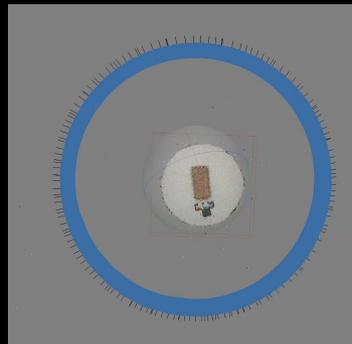

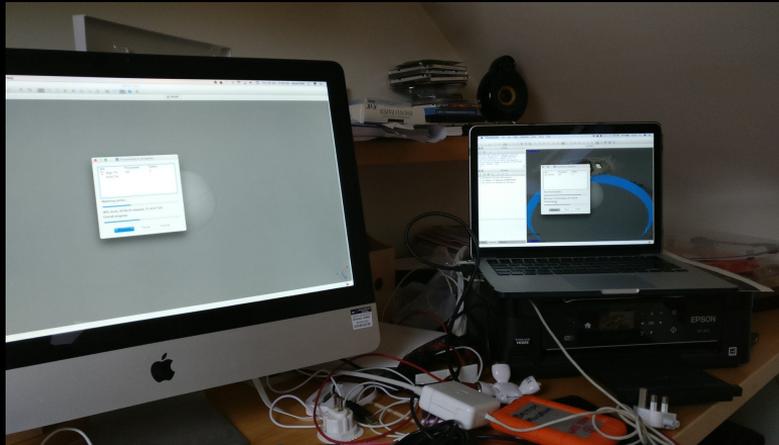

Photogrammetry: science of making measurements from photographs.

Outputs are typically maps, drawings, 3D models of real-world object, site, or scene.

Thank you to:

Dr Jonathan Taylor, Assistant Keeper, British Museum, for access to tablets and for his support of the project.

Daniel Pett, then ICT Advisor, British Museum, now Head of Digital and IT at the Fitzwilliam Museum, University of Cambridge, UK, for his advice, guidance, heuristics, equipment, processing, publishing, putting us in touch with Thomas Flynn from Sketchfab...

Dr Lily Withycombe, National Museum of Australia, who was the driving force behind making the boab nuts possible.

Jennifer Brian, National Museums of Australia, who allowed me to photograph the boab nuts while she was carrying out the condition check.

ANU Classic Museum for access to collection and trusting us with object handling!

NMA Digital Team for bringing objects from their handling collection
